WHEAT POOL NOTES

Eighty new members joined the Alberta Wheat pool during the first eight days of October. Contracts have been coming in to head office in a steady stream in spite of the fact that no active canvassing is being done. During the month of September 171 signed contracts were received by the Alberta Wheat Pool.

Deliveries of wheat to Pool elevators reached the high water mark on Monday, October 6th, when the day's receipts totalled over 800,000 bushels. The bulk of the receipts of grain by Pool elevators has been received from Southern Alberta as threshing has been delayed in the central and northern portions of the province.

Hesketh Grain has Highest Protein

The earlier threshed grain from the southern part of Alberta showed remarkably high protein according to tests made from many points. Samples from Hesketh and Idesleigh showed a protein content of 19 per cent, while many other points supplied samples of wheat which tested from 15 to 18 per cent protein content.

The semi-annual meeting of the boards of directors of the three provincial pools of Western Canada will be held at Calgary, October 16th. These interprovincial meetings are held at Calgary.

The terminal elevator at Victoria, B.C. owned by the Panama Pacific Grain Company has been leased by the Alberta Wheat Pool. This terminal has a capacity of one million bushels. The Alberta Wheat Pool now has control of terminal storage of over nine million bushels on the Pacific coast.

WORLD'S GRAIN SHOW NOTES

Italy will be officially represented at the World's Grain Exhibition and Conference to be held at Regina, Canada in 1932. "The competent Italian authorities" say the acceptance communication, "have received with great sympathy the invitation to participate," and concludes by saying that Italy will take part officially "either through the Royal Ministry of Agriculture and Forests or through the National Fascist Syndicates of agriculture and agricultural experts." Italy is the ninth country to officially accept the invitation to take part. The others are Peru, Yugoslavia, Guatemala, New Zealand, Czechoslovakia, The Netherlands, Poland and Belgium. Since Italy produces large quantities of grain and seed—crops of wheat, barley, oats and rye being the largest—she will certainly make a very valuable contribution to the Exhibition and Conference.

Prospective exhibitors at the 1932 World's Grain Show may be well advised to select samples for exhibits from this year's crop. As all exhibits must be in the hands of the awards committee at Regina on or before March 1, 1932, the selection, if not

20 DEGREES OF FROST REGISTERED ON MONDAY

HELP REQUESTS FAR TOO MANY STATES BROWNLEE

EDMONTON, Oct. 15.—Requests and claims made to the Provincial Government by Boards of Trade, Municipalities and other organizations in the Province for relief and construction of public works under Alberta allotment from the special relief fund of \$20,000,000 voted by the recent emergency session of Parliament amounted to between 40 and 50 times the amount of this province's allocation, declared Premier J. E. Brownlee.

In this connection he issued an appeal for consideration and co-operation with the Government on the part of such organization in facing a situation that is sufficiently difficult.

From the communications and delegations received, said the Premier, it would appear as though there was an organized effort being made by public service organizations along every Provincial highway to press for completion of that particular piece of work.

In addition, municipalities were pressing the Government with local improvement schemes of great magnitude and in many cases far beyond the needs of the employment or unemployment situation in the districts concerned.

For instance, one municipality applied for a relief program where there was only one man registered as unemployed. Another municipality with a population of less than 200 applied for a greater program of relief than did Lethbridge, with many times the population and a far greater problem.

already made, must be taken from the crop of this year or from that to be grown in 1931. According to a report of tests made in the laboratory of the Canadian Grain Commission the wheat crop of this year possesses a very high protein quality and indicates a much higher gluten content than that of either of the years 1927, '28 or '29. In addition, the unusual dryness of the wheat of this season and the excellent quality of the flour made from it are very important matters. "Over 60 per cent of the crop received to date in Winnipeg this year," says the report, graded either No. 1 hard or No. 1 Northern. In view of these facts and remembering the rigid examination to be made by the judges of the sample entered for competition at the World's Grain Exhibition and Conference to be held at Regina in 1932 prospective exhibitors may be well advised to select from this year's crop. The season of 1931 may not be so favorable for the production of quality seed. The same conditions as apply to wheat may apply to the production of other grains and seed as well.

By all appearances winter has commenced. After five days of dull weather the onslaught occurred and on Tuesday the district was visited by a regular blizzard. The snow has drifted in some places and roads are filled with snow in the low spots. On Tuesday night the coldest part of the season was recorded when there was about 20 degrees of frost. The weather continued cold all day Wednesday and more snow fell during the day, although the sun has been shining. As we go to press the weather remains cold and cloudy and no doubt we will have more snow.

The snowfall and cold weather is rather early and it is not expected that the winter will set in just yet. It is to be hoped that we will have a few more days of Indian summer and if the gophers and other wild animals are signs of a late fall, we will have a few weeks of fine weather before the winter sets in right.

This cold snap has been prevalent all over the province and in other parts of the Dominion.

Enroute to London where it will adorn the walls of the British Medical Association in Tavistock Square, a mounted Buffalo head, a gift of the people of Canada, left Winnipeg by Canadian National Express recently.

The head was presented to the British Medical Association by Premier Bennett during their recent convention in Winnipeg, and was received on behalf of the Association by Dr. Harvey Smith, of Winnipeg, President of the British Medical.

Taken from the Buffalo herd in Wainwright Park, the head is one of the finest specimens according to a Winnipeg taxidermist who packed the head for shipment.

TOWN PLANNING IN ALBERTA

(By Horace L. Seymour)

Being a series of short articles explanatory of the provisions of The Alberta Town Planning Act and Regulations thereunder.

ARTICLE 7

Farmstead Planning

The term "farmstead" is used to include that part of the farm that takes in the home and its grounds, barnyard and buildings. Planning for such an area has become an important part of the work of the Provincial Town Planning Office; over 50 inspections or surveys were made in 1929, with assistance from some of the district agriculturists of the Province. General principles of farmstead are illustrated by typical diagrams, and include such matters as placing and grouping of buildings, sanitation and planting of trees, shrubs and flowers—plans that might take several years to become fully effective, but ones that can be worked to.

Individual plans are prepared for particular locations where, as a rule, some permanent buildings have already been erected, and the suggested lay-out is consequently influenced thereby.

Those who wish to procure trees for shelter belts or windbreaks free of cost should communicate with Mr. Norman M. Ross, Dominion Government Forest Nursery Station, Indian Head, Sask., before the First of March in the year preceding that in which they wish to plant. As supplied, poplars and willows are cuttings, maple, ash and caragana are seedlings. For conifers or evergreens, such as Scotch pine or white spruce, there is a charge of \$3.00 per hundred, together with the usual express or freight charges.

There is no charge for the Provincial planning service and those farmers interested should communicate with the director of Town Planning, Parliament Buildings, Edmonton. Surveys of individual farms will be made and plans subsequently prepared as soon as practicable.

CONTROL BOARD KEENLY ALIVE TO BEER ABUSE IN ALBERTA

That the Alberta Government Liquor Control Board is keenly alive to any abuses that develop in connection with the sale of liquor within the province is evidenced by a circular letter recently sent to all hotel licensees by Mr. R. J. Dinning, Commissioner, which reads as follows:

FREQUENTERS OF BEER ROOMS

Recently it has been brought to our attention that, particularly in the rural districts, certain individuals who are public charges are frequenting licensed premises and obtaining beer.

It should not be necessary to bring to the notice of licensees the seriousness of the economic situation which will confront Alberta for some months to come. Municipalities, both rural and urban, are going to expend important sums of money in providing relief. In view of this it becomes imperative that all hotelmen in the province make a special effort to discourage certain abuses developing in connection with:

Men drinking in the beer-room who are directly or indirectly receiving relief from any municipality or charitable organization.

Men who are known to be having difficulty providing the necessities of life for their families.

Serving men who are leaving their families in want and spending money on liquor.

Serving men who persist in drinking to excess or who show an inclination to remain in the beer-room indefinitely.

We are asking all licensees to give particular attention to the carrying out of these requirements. Our inspectors are being instructed to interview officials of municipalities and others, to ascertain if any of the above mentioned abuses are developing.

GENERAL CROP REPORT

It is said that two weeks are necessary to finish the harvest in the Prairie Provinces. Though interrupted by rains, threshing is practically finished in Manitoba and the Southern Area of Saskatchewan. In the Northern Area of Saskatchewan it has been about 60 per cent completed, and in Alberta from 10 to 40 per cent. In Quebec harvesting of grains has been completed, except in the Saguenay and lower St. Lawrence districts, where operations were delayed by rain. In Ontario the con-

LOCAL MINES ARE WORKING STEADY

The past month has been one of activity in the Carbon Coal Camp and all mines have been working to full capacity. There is an abundance of coal orders and the mines report a scarcity of miners at the present time. We have been told that all the mines have sufficient coal orders to keep them busy till the middle of December and this is encouraging news for the district of Carbon.

In the Black Diamond Mine, J. H. Oliphant has installed a coal cutting machine to cope with the increased business.

HIGH STEPPING YOUTH AND BEAUTY IN PICTURE

Portraying a new side of collegiate life in vivid colors, but with rare understanding, "Red Lips" starring Charles Rogers and Marlan Nixon, will show at the Carbon Theatre on Friday and Saturday of this week.

Because of its youth and interest, college has been a frequent subject of motion pictures. Universal has chosen to show the glamorous side in "Red Lips" and depicts the romance between a shy youth and an off-campus flapper. Rogers and Miss Nixon, two of Hollywood's youngest stars, are said to portray to perfection the heart of young youth. An entire college campus was constructed for the picture. It includes a track, dormitory, student's amusement hall and other features of collegiate life. The picture also shows the petting party and whoopee.

"Red Lips" is from a story by Percy Marks, author of "The Plastic Age," sensational novel of college life. "Red Lips" is equally sensational and similar in theme. Melvyn Brown adapted the story for the screen. He was then assigned the job of direction.

Tinued dry weather has retarded full ploughing and the acreage of fall wheat is well below average. The crop already seeded, however, on the whole looks promising. In the Maritime provinces weather conditions are satisfactory, and a good average grain crop has been harvested. In British Columbia recent rains have been very beneficial. Excellent crops of apples and potatoes are reported.

Know your druggist better—He's your Doctor's right hand man.

Of all the services your druggist renders, the one which sets him apart as the family's friend in the hour of sickness is the dispensing of prescriptions. 'Fresh from the gardens'

Attitudes Of Mind

It is reported in a daily newspaper that some doubt existing as to which side of the international boundary line between Canada and Maine a certain old lady's farm was located, surveyors were employed and the decision finally reached that it was on the United States side. "I'm so glad!" exclaimed the old lady, "Canadian winters are so severe."

Travelling from the United States to Canada on one occasion, the writer overheard a passenger remark just after the train had entered Canada: "The air is so much sweeter and purer now that we are back in Canada."

Climate to these people was an attitude of mind, but, nevertheless, very real. It leads one, however, to wonder whether many people do not approach many of their daily activities, not on a basis of actualities, but from some purely mental reaction.

On the day following the general election of July 28 last, a merchant in one of our Saskatchewan cities, a strong Conservative by the way, declared that his business had already greatly improved. He overlooked the fact that two fairly large conventions then in session in the city might have added somewhat to his day's sales. No, it was an attitude of mind with him,—business had improved over night because the Conservatives had won the election.

It is the same with many in respect to hard times. Some people whose salaries, or wages, or other sources of income, are the same now as they were in the boom days, or even greater, but whose cost of living is much less, due to lower commodity prices, "feel" harder up than many who actually suffer, they become terribly pessimistic and continually harp on the blue ruin aspect of things and how difficult they are finding it to make ends meet.

Without in the least discounting actual conditions, it is safe to say that with many people hard times is an attitude of mind, superinduced, maybe, by fear of the real thing, rather than the thing itself. Unfortunately there are many who are faced with truly hard times and have concrete problems to solve and difficulties to overcome, but there is a multitude of others who are no worse off today than they ever were but who "think" they are. They are largely responsible for cultivating and disseminating ideas that conditions are much worse than is actually the case.

The influence of mind over matter is a well authenticated and recognized fact. Records in doctors' offices contain scores and hundreds of cases of people who, having nothing the matter with them, imagined there was something wrong and by constantly and morbidly dwelling on their imagined ills actually did become chronic invalids.

There is, too, that state of mind wherein people develop suspicions of others without any cause or evidence to support such suspicions, but, having become suspicious of another, every word and act of such person, however simple and innocent, only serves to confirm and intensify the suspicions of the former.

Such attitudes of mind are to be deplored, and their cultivation to be guarded against by every individual. The harm done through constant thinking of unpleasant and evil things, and the harboring of thoughts of suspicion of others, or even of weaknesses in one's self, is almost incalculable. It spreads like a miasma through society polluting the life of whole communities.

Fortunately, the reverse of this is also true. The cultivation of clean, kindly and noble thoughts, the development of feelings of confidence in and goodwill towards one's neighbors, creation of the habit of looking at the bright rather than the dark side of things, also spreads through society and uplifts and brightens the lives of all persons with whom such a sane and happy individual comes in contact.

Jamaica Buys From Canada

Is Grateful For Tariff Preference On Fruits and Vegetables

Canada is getting all kinds of business that formerly went to the United States because of Jamaica's gratitude to Canada for recent tariff preferences, according to L. T. Kennedy, prominent business man of Kingston, Jamaica, who was a recent visitor in Montreal.

"We in Jamaica are very grateful to Canada for her preference in fruits and vegetables, and as a result, millions of dollars worth of business which formerly went to the United States is now being diverted to Canada. We buy a great deal of flour from you, among other things," he said.

A woman may be clever enough to do any work a man can do but the cleverest gets some man to do it for her.

A London bookseller has collected more than 400 editions of "Robinson Crusoe" in all languages.

Unemployment Relief

Separate Unit Of Labor Department Will Deal With Details

A separate unit will be established in the Labor Department to administer the details of the \$20,000,000 fund for dealing with unemployment relief. It will operate under the Minister of Labor who will have associated with him in the work the Minister of Railways and Minister of Public Works. Harry Hereford, of Ottawa, will be in charge of this unit with the title of Director of Unemployment Relief. He was formerly in the Labor Department as registrar under the Industrial Disputes Investigation Act.

Maple Sugar Industry

Production of maple syrup and maple sugar in Canada in 1930, had a value of \$5,250,620. Of this amount, 2,185,379 gallons of syrup accounted for \$3,869,107, and 8,208,276 pounds of sugar for \$1,381,513. The average price of the syrup was \$1.77 per gallon and of the sugar 17 cents a pound.

Wealthy For a Day

Girl Student From Copenhagen Enjoyed Herself In Berlin

Miss Maiken Borring, a student of medicine from Copenhagen, Denmark, experienced being a millionaire for a day in Berlin. She had won first prize in a contest sponsored by the Danish daily, "Politiken," which meant that she was permitted to spend one day in Berlin with all bills, no matter how high, paid by the paper.

There was one condition, however, Miss Borring was not allowed to acquire anything which might be of value to her after her role of millionaireness expired.

She therefore found the task of spending money somewhat difficult. A visit to Prof. Albert Einstein, an airplane spin, a drive about town in a costly limousine, sumptuous meals at the most expensive Berlin restaurants and attendance at a theatre comprised her day's "extravagances."

Pale People Are In Peril

Some Form Of Nervous Breakdown Always Threatens Them

Pale people are almost always nervous. Paleness denotes lack of blood and too little blood usually results in jaded nerves, sleeplessness, headaches or neuralgia.

Dr. Williams' Pink Pills are different from most other medicines—it is impossible to take them and not feel better. Their whole mission is to make rich, red blood. This new blood strengthens the nerves and gives vitality to the whole body. Concerning them Mrs. G. Cook, Bloor Street, Toronto, says: "Two years ago I used Dr. Williams' Pink Pills for a nervous breakdown with the result that I have been well and strong ever since."

You can get these Pills from any dealer in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Canada Playing Valuable Part

Vancouver Expert Will Lay Rails For Bermuda's First Railway

Canada will play a valuable part in the construction of Bermuda's first railway, which is hoped will be completed within a year or so. Louis McDonald, of Vancouver, expert in road beds and track laying, has gone to Bermuda aboard the C.N. steamer "Lady Somers," after engaging ten men in Montreal to follow him later to Bermuda. The Vancouver expert has been 35 years in the business of rail laying. He served under General J. W. Stewart in the 12th Railway Troops during the world war and is now working with Belfour, Beatty and Co., London, England, builders of the new railroad.

Women and Asthma. Women are numbered among the sufferers from asthma by the countless thousands. In every climate they will be found, helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. J. D. Kellogg's Asthma Remedy has brought new hope and life to many such. Testimonials, sent entirely without solicitation, show the enormous benefit it has wrought among women everywhere.

His Nightly Message

This often repeated nightly message which his chauffeur delivered to Sir J. Bickerstaffe was on the latter's funeral wreath: "The fire's dying out; the water is nice and hot; the windows and doors are bolted; the mouse traps are set and there are no mice. Good-night, Sir John."

If Miller's Worm Powders, needed the support of testimonials they could be got from mothers who know the great virtue of this excellent medicine. But the powders will speak for themselves and in such a way that there can be no question of them. They act speedily and thoroughly, and the child to whom they are administered will show improvement from the first dose.

Parachute For 'Plane

A parachute for an aeroplane, designed by Dr. J. T. Parr, a dentist of Oakland, California, is released by pressing a control lever. This opens a trap-door in the upper wing and the parachute is shot out. The 'chute swings the 'plane and pilot slowly to earth, and has a landing speed of about 15 miles an hour.

ternoon each week.EDOUARD J. ROULEAU,
Editor and Publisher**SPONGING ON THE WEEKLY
NEWSPAPER**

"Please use in earliest edition.
Many thanks for past favors," is the
printed instructions accompanying a
reader advertisement received by the
editor from a cigarette manufacturer.

He is asking the free insertion of
an advertisement which should bring
the newspaper \$7 or \$8 at the regular
reader rates.

There is only one of the hundreds
of like requests received from manu-
facturers and others who seek space
in the weekly newspapers without
paying for it. It is not used by the
self-respecting newspaper. It goes to
the waste paper basket where it be-
longs. We use it to light the fire with.

That is the trouble with too many
of our Canadian manufacturers. They
want something for nothing. Like too
many people, they pay for everything
connected with manufacture and sale
of their product, then demand free
publicity—the most important element
connected with the transaction—free
of cost.

They seem to think the newspaper
editor is just waiting for the copy and
will tumble over himself rushing it
into print.

There may have been a time in the
life of the weekly newspapers of Can-
ada when the free publicity grafted
succeeded in putting it over. Not now.
Yet he persists, and will persist as
long as there is a chance to get some-
thing for nothing. But in The Chron-
icle office such junk is promptly con-
signed to the waste paper basket.

These free publicity hunters do not
know their onions. Any newspaper
will co-operate with the advertiser to
get results, but will not be the goat.

**CANADA'S BANANAS TARANTULA
HARMLESS.**

In a few weeks time the novel os-
calators which carry bananas from
the holds of Canadian National liners

at Montreal docks to the shoulders
of waiting laborers will be moved to
Halifax. The oscillators have had an
extensive period of trial and have
proven eminently satisfactory, greatly
reducing the time required to unload
the stocks of this West Indies fruit.

Although Canadians consume large
quantities of the banana, recently
discovered to be a fine nourishment
for athletes, Americans quite outclass
their Canadian cousins in the field
of banana eating. J. M. Pringle, Pres-
ident of the Canada-West Indies Fruit
Company, says that during 1929 the
world consumed 9,500,000,000 bananas.
During the same year each American
ate an average of 50 bananas each
and each Canadian ate only 33 ban-
anas. The reason for the difference
is that the Canadian public is not
educated to the use of bananas, states
Mr. Pringle.

The banana is shipped in a green
state and ripened near its market in
the wholesaler's storage space.

He exploded one belief which has
been the fond basis for many a fiction
story. Tarantulas, he stated, are
not deadly. He does not think that a
tarantula sting would cause the
death of any normal person. Furthermore,
Mr. Pringle avers, those big,
hairy spiders are not necessarily
found in bunches of bananas. He
said that one finds tarantulas in rot-
ten wood more frequently and he
questions whether a complete search
of all banana shipments in or en
route to Canada would reveal a single
tarantula.

WHY FAT MEN STAY FAT

"The trouble with me, and I guess this applies to 99 out of every 100 men who are putting on weight, I didn't have the energy or 'pep' to keep it off. Lost all interest in any healthy activity and just lazed around accumulating the old pounds, until I got that 'Kruschen feeling.'

Start taking Kruschen Salts—that's the common-sense way to reduce—but don't take them with the idea that they possess reducing qualities in themselves.

This is what they do—they clean out the impurities in your blood by keeping the bowels, kidneys and liver in splendid working shape, and fill you with vigor and tireless energy.

As a result, instead of planting yourself in an easy chair every free moment and letting flabby fat accumulate, you feel an urge for activity that keeps you moving around doing the things you've always wanted to do and needed to do to keep you in good condition.

Kruschen Salts are the up-to-date Fountain of Youth. Take one-half teaspoon in a glass of hot water to-morrow morning and every morning—be careful of the foods you eat—take regular moderate exercise—then watch the pounds slide off.

WORLD HAPPENINGS BRIEFLY TOLD

Alex. Chisholm, prospector and veteran of the "trail of '98," is dead at Smithers, B.C., at the age of 70.

Wireless telegraph service has been established between Buenos Aires and Chilean cities and with Spain.

The \$100,000,000 Canadian government bond issue floated in the New York market October 7, was heavily over-subscribed.

Assembly of the League of Nations stood in silence several moments on the occasion of the first anniversary of the death of Gustav Stresemann, German post-war foreign minister.

The eleventh assembly of the League of Nations adjourned Oct. 4, after wrestling earnestly for three and a half weeks with pressing world problems.

Reports published abroad that trouble had arisen aboard the British battle cruiser "Revenge," anchored in Golfe Juan harbor, Nice, France, were denied by authoritative sources.

A number of delegates attending the Canadian Automobile Association convention at Vancouver endorsed the proposed highway through British Columbia to Alaska, in addresses made at the annual banquet.

The London Times editorially said that Russian dumping of grain on European markets was "clearly due first and foremost to desperate need of the Soviet Government for credits to finance their five-year industrialization plan."

The Department of National Defence announces that Major D. R. Sargent has been promoted to the rank of lieutenant-colonel and to command the 2nd Battalion, the Scottish Regiment. The regimental headquarters are at Nanaimo, B.C.

The Oil Of Power.—It is not claimed for Dr. Thomas' Electric Oil that it will remedy every ill, but its uses are so various that it may be looked upon as a general pain killer. It has achieved that greatness for itself and its excellence is known to all who have tested its virtues and learned by experience.

Daily Air Service

A daily air service between Lethbridge, Calgary and Edmonton, Alberta, a distance of 320 miles, has recently been inaugurated. This new service connects with the air mail service from Calgary to Winnipeg.

Against Grippe

Having a bottle of Minard's handy at the right time will often save a doctor's fee. For colds, sore throat, bronchitis.

IS ELECTED PRESIDENT

Walter Ashfield, Editor Of the Grenfell Sun

Weekly Newspaper Publishers Meet

Fourteenth Annual Convention Of Canadian Weekly Newspaper Association, Saskatchewan Division

At their fourteenth annual convention held at the Saskatchewan Hotel, Regina, the Canadian Weekly Newspaper Association (Sask. Division), elected Walter Ashfield, Editor of the Grenfell Sun, as president for the ensuing term.

H. G. Sheldrake of North Battleford, the retiring president, was chosen as honorary president; A. King, Rouleau, vice-president; S. J. Dornan, Alameda, secretary-treasurer; while the following were elected to the executive: S. N. Wynn, Yorkton; E. P. Hodgins, Vanguard; J. J. Zubick, Kerrobert; J. Scott, Whitewood; H. Berryman, Blaine Lake.

Several instructive addresses were given during the sessions. Mr. T. A. McInnis of the Bureau of Publications, gave an interesting talk, and Hon. J. F. Bryant spoke on the subject of Saskatchewan's Resources. The members of the association were the guests of the Saskatchewan Government at a banquet on Thursday evening, Oct. 2. Following the banquet an informal dance, sponsored by the Toronto Type Foundry Co., was greatly enjoyed. At noon on Friday, Oct. 3, the members were tendered a luncheon by the Saskatchewan Wheat Pool, and on Friday evening the Weekly Newspaper Association banquet was held at which the newly-elected president presided. It was decided to hold the 1931 convention at Regina.

Expansion Of Dye Industry

Discovery Of Synthetic Dyes Has Been Wonderful Help

In the dyestuffs industry there was what may be called the Woad epoch of dyes which lasted until little more than half a century ago. The colors used in textiles and many other industries were natural products coming from plants or animals or minerals. It is an old story with a modern lesson that the scientific curiosity of Perkins, an Englishman, led to the building up, from the waste products of the distillation of coal, of artificial dyes more brilliant than Tyrian purple, more lasting than saffron and indigo, and without limit in their shades and tones. The discovery of pure research, led, although not in this country, to the founding of an industry invaluable to world not only for its primary output but also from the circumstances that it has required, created, and supported an army of research chemists. The labors of these men enabled Germany not only to secure almost a monopoly of the production of dyestuffs, but also to take the lead in the discovery and marketing of synthetic drugs, and, in the hour of her need, to thwart the endeavors of the Allies to deprive her of munitions of war.

Athletes recommend Minard's Liniment.

Perfect dyeing so easily done!

DIAMOND DYES contain the highest quality anilines money can buy! That's why they give such true, bright, new colors to dresses, drapes, lingerie.

The anilines in Diamond Dyes make them so easy to use. No spotting or streaking. Just clear, even colors, that hold through wear and washing.

Diamond Dyes never give things that re-dyed look. They are just 15¢ at all drug stores. When perfect dyeing costs no more—is so easy—why experiment with make-shifts?

Diamond Dyes

Highest Quality for 50 Years

A Huge Undertaking

Building Of Sydney Bridge In Australia Requires Much Skill

The central arch of Sydney Bridge in Australia has been closed and it is expected that 18 months will elapse before the bridge is open for traffic. Construction by the British firm of Dorman, Long & Co., it is the largest arch bridge in the world. The contract price was £4,217,721, but the total cost will probably exceed £6,000,000. There were provisions throwing on the New South Wales Government the extra cost due to rises in wages, which have been large.

In planning the bridge it had to be considered that more than half the total traffic of Sydney, the chief port in Australasia, had to pass under it.

The bridge had to give headroom and clearance to big ocean liners. The central arch is a single span of 1,650 feet, and there is a clear headroom for shipping of 170 feet at low water. The top of the arch is 440 feet above the water, exactly the same height as the highest point on Hampstead Heath, and 75 feet higher than St. Paul's Cathedral. With its approaches the bridge is 3,770 feet long. The total width of the deck of the bridge is 160 feet. It carries four lines of electric railway, in addition to a 57-foot roadway and two footways. There are 37,000 tons of steel in the arch construction and 13,000 tons in the approaches—or a total of 50,000.

Persian Balm — the delight of dainty femininity. Imparts a fragrant charm to the complexion. Tones up the skin and makes it velvety soft in texture. Cooling, refreshing, it is delightful to use. Never leaves a vestige of stickiness. Invaluable for hands, face, and as a hair fixative. Wonderfully soothing and protective. Especially recommended in cases of roughness or chafing caused by weather conditions.

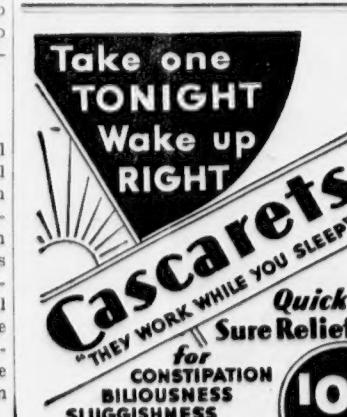

Catering To Visitors

Windermere, England, Bans Sunday Civic Sports To Boost Scenery

To boost its scenery and also give city employees a holiday, Windermere, England, has decided that all municipal tennis courts, putting greens and golf courses be closed on Sunday. Those in favor of sports on Sunday afternoons said that records showed that the clergymen and residents of Windermere used to watch football being played after church on Sunday, but the city council decided that visitors should go to Windermere for scenery and solitude.

Immigration Returns

During the first four months of the current fiscal year, 58,273 immigrants were admitted to Canada as compared with 94,214 for the similar period of 1929. Those from the British Isles numbered 19,317 and from the United States, 12,075, while 11,109 came from Northern Europe.

SUNDAY SCHOOL LESSON

OCTOBER 19

SIMEON AND ANNA — THE INSIGHT OF THE PURE IN HEART

Golden Text: "Blessed are the pure in heart; for they shall see God." — Matthew 5:8.

Lesson: Luke 2:25-39.

Devotional Reading: Psalm 84:1-7.

Explanations and Comments

Nunc Dimittis, 2:25-32. — At the time of the birth of Jesus there was living in Jerusalem a righteous and devout (the Greek word means literally "God-fearing") man named Simeon, who was looking for the coming of "the consolation of Israel," for the promised Messiah. "It is striking to observe how the description of Simeon's character expresses the aim of the whole Old Testament revelation. All that was meant by the preceding long series of manifestations through all those years was accomplished in the man. For hearken how he is described—'just and devout,' that is the perfection of moral character, stated in the terms of the Old Testament; 'waiting for the Consolation of Israel,' that is the ideal attitude which the whole of the gradual manifestation of God's increasing purpose running through the ages was intended to make the attitude of every true Israelite—an expectant, eager look forwards, and, in the present, the discharge of all duties to God and man. 'And the Holy Ghost was upon him,' that, too, in a measure, was the ultimate aim of the whole revelation of Israel. So this man stands as a bright, consummate flower which had at last effloresced from the roots; and in his own person, an embodiment of the very results which God had patiently sought through milleniums of providential dealing and inspiration." — Alexander Maclaren.

The Holy Spirit had revealed to Simeon that before he died he should see the Lord's Anointed. "Some inward monition, which he recognized to be of God, sent him to the temple in the expectation that at last he was to see the Lord's Christ." When the parents brought in the child Jesus, Simeon took the Babe in his arms and blessed God and spoke the beautiful words which have received the name of "Nunc Dimittis," the first two words of the sentence in Latin.

Simeon's Words To Mary, verses 33-35.—Simeon blessed Joseph and Mary (Joseph fulfilled here the part of a father), who stood there marvelling at his words, and to Mary he said, "Behold this Child is set for the falling and the rising of many in Israel"; some will reject Him and "fall," while some will accept Him and "rise" to a high spiritual life.

Good Recipes

Smoothness Of Texture In Recipes That Call For Milk and Sugar

Do you ever have difficulty in getting a smoothness of texture in recipes that call for milk and sugar? Good recipes obtain wonderful flavor and consistency through the use of Eagle Brand Sweetened Condensed Milk. The milk and sugar are thoroughly combined (almost pre-cooked you might say) so that results are obtainable that could not be expected if you mixed the sugar and milk yourself. Having the milk and sugar already blended is a great advantage. Aside from saving sugar—and the trouble of mixing—there is the certainty of a finer flavor to the dish. The condensed milk combines quickly and easily with all other ingredients—binds them closer together—and gives the recipe a smoother texture. Another advantage of condensed milk is its convenience. One can keep several cans on hand as it keeps perfectly, so there is no such thing as running short, but rather a certainty of pure, fresh milk whenever it is required.

As a vermifuge an effective preparation is Mother Graves' Worm Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

Marvellous Yield Of Oats

Alert to the possibilities of "Marvellous" oats, William White, farmer of the Alert district, southeast of Biggar, Sask., has reaped a marvellous yield. From an experiment plot of four and a third acres, he threshed 121 bushels to the acre. The oats weighed 42 pounds to the bushel. The land was new breaking on an old pasture field. Neighbors threshed the grain, measured the plot and verified the yield.

Plenty Of Wheat

George Kabel, 67-year-old Illinois farmer, estimates that he has threshed enough wheat during the past 60 years to make 118,320,000 loaves of bread. His average has been 30,000 bushels a year.

Minard's Liniment For Chest Congestion.

QUALITY

Made of pure materials in modern sunlit factories.

No expense spared to have it clean, wholesome and full flavored.

WRIGLEY'S

STOPS COUGHS

Flaky Pie Crust

The secret of making good pie crust is: "Use Purity Flour—and keep the dough dry!" Try this recipe—for 2 shells:

3 cups Purity Flour 1 cup lard

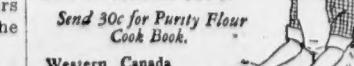

½ teaspoon salt 1 cup cold water.

METHOD: Mix the flour and salt, cutting in the shortening until the mixture is like fine meal, gradually adding exact quantity of water but not a drop more. Use less water, if you can, and the pie crust will be even flakier.

Turn out on board very lightly sprinkled with Purity Flour, roll about ½-inch thick. Spread balance of shortening over dough, fold over three times and roll again to required thickness. Bake in hot oven (450°).

Send 30c for Purity Flour Cook Book.

PURITY FLOUR

Immediate Relief for INDIGESTION

WHAT most people call indigestion is usually excess acid in the stomach. Food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude help. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention, it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume

in acid. The results are immediate with no harmful after-effects.

Once you learn this perfect way you'll never deal in any other manner with the headaches, gas, bloating, nausea, dizziness, indigestion, biliousness, etc., due to an over-acid stomach and bowels.

Be sure to get genuine Phillips'. It is always a liquid; never made in tablet form. Look for the name Phillips' on the bottle. All drug-stores—50c.

CHAPTER II.—Continued.

"Do you know," he broke in prosaically on this sober reverie, "I'm almost famished. No" (as she turned a surprised face to him), "don't say it. I know it's only eleven-thirty. I know it's not time to eat; and I don't care. Thunder! Gay, I've lived all my life by rules. I hate 'em. From now on, unless you make a nice tame house-cat of me, we'll eat when we're hungry; that is," he added, grinning, "if we can arrange to be hungry at the same time!"

"Otherwise," smiled Gay, her fears vanishing before his carefree grin, "I infer that we'll eat when you're hungry."

Nick laughed, but refused to answer this awkward question. Instead he said, stopping the car: "Here's a brook and a pine tree, so near that we can easily keep an eye upon the river, though no self-respecting tramp would consider stealing it. Say! you don't mind eating early, do you?"

The girl laughed at this tardy return to manners.

"What am I, to decree when I shall eat, if my lord and master . . .

"Gosh!" Nick interrupted fervently. He raised awed eyes to heaven. "She calls me her lord and master! But" (with a sudden dropping to earth), "you can cut out that line of talk, Gay. It's mediaeval. Call me 'the boss,' if you must; but not 'your lord and master. I'm at home in jumpers, but I'd look a fool with an ostrich feather in my cap."

"I'm not so sure of that," Gay contradicted, regarding his clear-cut profile critically. "One of those three-cornered hats, you know, with a plume resting on your shoulder. . . ."

"Glory!" gasped Nick, staring at her. "Have you lost your mind, Gay? Come on; let's eat. It's lucky you brought along that lunch."

To her surprise Gay found that she was hungry. They devoured Miss Sadie Twitchell's chicken, with all the greed of childhood days. Indeed, after feasting on the drumsticks, Nick was obliged to wash in the convenient brook.

"Clean?" he questioned, turning a dripping countenance upon her; and Gay, laughing, dried his face on a paper napkin. But when he suggested

wading, and confessed a yearning to build a dam, she hesitated.

"The water's like ice, Nick; and besides . . ."

She was thinking that they were still some miles from that place where one procured a license and got married, "all in an hour"; but Nick sighed resignedly, and for a moment his face clouded.

"When I planned this trip, Gay," he explained, "I vowed I'd do every darn thing that came into my head; yet I begin—"

"You begin," she interrupted, a little catch in her voice, "you begin by asking a girl to marry you. I suppose that just 'came into your head,' but it changed—everything. Oh, Nick, I don't want it to change things! I want all your dreams to come true. Build that dam if you want to terribly, and—wade. I'll wade with you. I'd really like it, Nick. I—"

In her contrition she was pulling at his shoestrings, but he caught her hands, holding them with gentle firmness.

"Why, Gay!" His voice was tender. "I believe you're almost crying. What a dear goose you are! And why should it matter if things are a little different than I planned? Don't you know that I love having you along?"

"Really, truly, Nick?"

She lifted a sweet, flushed face, and he smiled into her eyes.

"Really, truly, Gay." He bent to her, then straightened up abruptly. "And you were right to squelch my kid desire for wading. There's something better ahead of us today."

He gave her hands a reassuring squeeze, and lifting the empty basket, threw it with careful aim into the car.

"Let's be off," he said, with all the enthusiasm she could desire. "I refuse to speed. I want to enjoy everything we see. By three o'clock we should reach State Line, and then . . ."

He gave her a comical glance; a curious blending of affection and amusement, as if he were not yet quite ready to be serious about the future.

This was Nick's great adventure, thought the girl tenderly—his quest for the freedom he had never known. Not by word or look must she dim his happiness. She wondered, as mile after mile slipped by and he showed no sign of the nervousness she felt herself, if he realized the enormity of the step they were about to take. Only once did he mention it, and then to quote laughingly when a tire went flat: "Needles and pins, needles and pins, when a man marries. . . . You see, Gay, what you've brought me to. But for you I'd be on my trusty feet." Yet he whistled cheerfully as he worked, and said, as they started on their way: "We're a half-hour late at the goal, my dear, but why worry, so long as we're together?"

But it was after four o'clock when they drew up before a shabby wooden building which flaunted a sign reading: "Josiah K. Miller, Justice of the Peace."

Nick stopped the car, but for a minute he did not stir. He sat there, arms folded, looking straight ahead, till Gay said gently: "Nick, it—it's

not too late now if—if you want to . . ."

"Back out?" smiled Nick. He faced her, and something in his eyes made her heart race. "I don't desert my bride at the altar, Gay." He grinned. "Doesn't look much like an altar, does it?"

His eyes were raised to the window below which hung the sign. Then, before she could speak, he was out of the car, giving a little brush to his clothes as if in a desire to appear well on this occasion.

"I'll just run up and see if this is right, though I believe the town clerk usually perches near a Justice in these Gretna Greens. I never got a marriage license before, Gay, and it may take time. If I'm longer than you expect, don't worry. I shan't go back on you! My dear girl, you look solemn as a funeral. Cheer up—the worst is yet to come!"

He turned away, then hesitating at the dingy doorway, came back to say: "Of course you know, Gay, that I was only trying to brace you up? There isn't going to be any 'worst' about it, either for you or me."

It seemed to Gay, waiting nervously outside, that he was a long time gone; yet when she saw him coming, she felt, with womanly inconsistency, a sense of panic. The street was almost deserted of passers-by, but he came near and spoke softly.

"I've got the license, and the Justice is waiting for us. I—"

"Nick," broke in the girl suddenly, "couldn't we go to—to a minister?"

He laid a comforting hand on hers.

"I'm afraid not, dear. There's been a lot of publicity lately about underage couples getting married here. You look about fifteen, Gay, and I'm no Methuselah! The parsons have been forced to shut down on these hasty weddings—that is, they won't do it without some sort of investigation. And we haven't time for that, though I hate like thunder to ask you to come up here."

"Is—is it an awful place?"

Nick smiled.

"I haven't seen it. The town clerk offered to act as witness and tell the Justice we were here. Come, dear. We mustn't keep him waiting."

Gay stepped onto the sidewalk, glancing down with apprehension at her dusty shoes.

"Do I look a sight?"

"You look all right to me, Gay, and that's all that matters." Then, with a sudden understanding of her mood, he added: "You look great! I bet that town clerk will expire of envy!"

So it was with a laugh that they started up those dingy stairs that were to lead them they knew not where. The echo of that laughter was on their lips when Nick opened the door bearing the name of Josiah K. Miller; but it died at their first glimpse of the room beyond. It was, thought Gay, with a sense of suffocation so much worse than she'd expected! The dust of the stairs and hallways seemed to penetrate the very

It is natural for children to be happy, active and full of fun. When they are fretful, fussy and disinclined to play you may be sure something is wrong. Almost invariably that something lies in the digestive tract.

It is to meet the need for an absolutely safe corrective of childhood ailments that Baby's Own Tablets have been designed. They gently regulate the stomach and bowels and thus drive out constipation and indigestion; break up colds and simple fevers and allay teething pains. Concerning them Mrs. W. E. Forsyth, Dover, N.B., writes:—"I would not be without Baby's Own Tablets as I know of nothing to equal them for fretful, fussy babies who are troubled with colds or sour stomach."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Her Three Children Troubled With Diarrhoea

Mrs. Leo Lapointe, Laurier, Man., writes:—"My three youngest children were very bad with diarrhoea. I tried all kinds of remedies, until a kind old lady told me to try Dr. Fowler's Extract of Wild Strawberry. I got a bottle right away and started giving it to them, and the next day the diarrhoea had stopped altogether. Now I will know what to do when any of my children are troubled that way again."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Remarkable Crops

Good Yields Of Grain Reported In Lloydminster Area

Some remarkable crops have been gathered in the Lloydminster area this year, running from 40 to 50 bushels to the acre in the case of wheat, and from 90 to 100 bushels in the case of oats. There has also been quite an active sale of farming machinery this year, one machinery agent stating that he had sold more threshing outfits this fall than during the past three seasons.

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching, from sour and acid stomach? Many believe they have heart trouble and tremble with fear, expecting any minute to drop dead. This condition can be prevented, likewise relieved.

Take Carter's Little Liver Pills after meals and neutralize the gases. Sweeten the sour and acid stomach, relieve the gas and encourage digestion.

The stomach, liver and bowels will be cleansed of poison, painful and dangerous indigestion disappears and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 25c pkg. of Carter's Little Liver Pills.

Little Helps For This Week

"God is our God for ever and ever; He will be our Guide even unto death."—Psalm xlviii. 14.

Thy way, not mine, O Lord, However dark it be, Lead me by Thine own hand, Choose out the path for me. Not mine, not mine the choice In things, or great, or small, Be thou my guide, my strength, My wisdom, and my all.

—Horatius Bonar.

We want a guide who knows us, whether we be self-willed and over-confident, or despondent and over-sensitive, or worldly and aspiring. We want a guide who knows our frame and pities us, is not vexed with our ignorance or mistakes, but is tender towards us and patient. We want a guide who values character, and knows how to train while He guides; who guides for the purpose of training, sometimes into very hard paths, but profitable for the soul.

—Theodore Dwight Woolsey.

Radium Ore Discovery

Deposits In Ontario May Yield Sufficient To Supply the British Empire

Belief that there are deposits of radium ore near Wilberforce, in Haliburton County, Ont., capable of supplying the needs of Canada, and possibly of the whole Empire, is expressed by Dr. G. E. Richards, head of the enlarged X-ray department of Toronto General Hospital. Dr. Richards is director of a company interested in the project.

He asserted that investigations over a period of three or four years had uncovered an apparently extensive deposit which averaged 186 milligrams of radium per ton of ore treated, a higher average than in the radium-bearing ore of the Belgian Congo, at present the world's chief source of supply.

Douglas' Egyptian Liniment is recommended for sore necks, galls, distemper, callouses and spavins. Removes proud flesh and Hoof Rot. Stops bleeding instantly.

A Curious Coincidence

It is an interesting historical fact, that although the Duchess of York is a daughter of a Scottish peer, she has a considerable amount of English blood in her veins, as her surname—Bowes—indicates, and, curiously enough, she is herself descended from the first Duke of York there ever was—Edmund of Langley, a son of King Edward III.

WHEN CHILDREN FRET

THERE are times when a child is too fretful or feverish to be sung to sleep. There are some pains a mother cannot pat away. But there's quick comfort in Castoria!

For diarrhea, and other infantile ills, give this pure vegetable preparation. Whenever coated tongues tell of constipation; whenever there's any sign of sluggishness. Castoria has a good taste; children love to take it. Buy the genuine—with Chas. H. Fletcher's signature on wrapper.

Personalographs

S. J. Garrett is back on the job this week after being confined to his home with a slight attack of appendicitis.

Guy Shell was a Calgary visitor last week.

Miss Monica Hodson arrived this week and is visiting at the home of Dr. and Mrs. McFarlane.

Len Poxon and Rev. Wm. McNichol left the first of the week on a goose hunt to Sullivan Lake.

Mrs. Ramsay Nash spent Monday in Calgary.

Frank Emery returned on Saturday after spending the past two months harvesting near Nanton.

Mrs. W. Poxon was a Calgary visitor on Monday.

Chas. Ross and Dr. McFarlane went into Calgary on Monday and brought out Stewart Mortimer, who has been a patient in the Holy Cross hospital. Stewart will be looked after at Dr. McFarlane's residence.

Mrs. McKibbin returned home on Sunday after spending the past three weeks visiting with her mother in Champion.

The Trochu Inspectorate Teachers' Convention will be held in Carbon this year on Thursday and Friday, November 6 and 7. The local teachers are making extensive preparations and hope to make this convention one that will be a credit to the town.

A well has been dug below the curling ring and at ten feet a flow of water was struck. This well will probably be dug deeper in order to supply water for flooding purposes.

About 4000 tons of sugar beets are being delivered daily at Raymond, Alberta. The sugar beet crop, as usual was pretty good this year and more farmers should be going in for this product.

ANGLICAN CHURCH SERVICE
Sunday, October 19
Holy Communion at 11 a.m.
Sunday School at 10 a.m.
Rev. Attwood of Calgary will conduct the services.

Grain Truck Tires
that
"Earn their Oats"

YES SIR! You can't go wrong on the Goodyear Heavy Duty for the hard service your grain truck encounters. It's the roughest, toughest, huskiest tire we've ever seen! It's got an extra-rugged carcass of SuperTwist Cord. And a tread that keeps your wheels pulling.

It's also a mighty-low-cost tire — as our prices will show. And we've got your size in stock right here — no waiting for delivery.

An Aberdonian was on a visit to Canada. There he met a Canadian who asked him where he came from.

"Scotland," replied the Aberdonian.
"Give me your hand," said the stranger. "And what town do you come from?"

"Aberdeen."

"Give me both your hands," said the Canadian. "The last man I met from Aberdeen pinched my watch!"

Who Does Your
Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.
